## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

The species are as follows:

Species I – one example of a storage caddy (figures 1 and 2).

Species II-another example of a storage caddy (figure 3).

Species III-another example of a storage caddy (figure 4).

Species IV- another example of a storage caddy (figures 5A-5C).

Species V- another example of a storage caddy (figure 6).

Species VI- another example of a storage caddy (figure 7).

Species VII- another example of a storage caddy (see figures 8-10).

Species VIII- another example of a storage caddy (figures 11-12).

Species IX- another example of a storage caddy (figure 13).

Species X- another example of a storage caddy (figure 14).

Species XI- another example of a storage caddy (figure 15).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, None are generic.

Art Unit: 3618

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
